ON-OFF

The image shows a close-up of a rear cooler control panel. The panel is rectangular and dark-colored, mounted on a black leather-like surface. It features a rotary knob on the left with four positions labeled '1', '2', '3', and '4'. To the right of the knob is a small fan icon. Further right is an 'ON-OFF' switch with a red indicator light. The text 'REAR COOLER CONTROL' is printed above the knob and switch area. The entire panel is framed by a thin white border.
